

MATHSWELL YEAR 5/6 PROBLEM SOLVING

- The questions are given to the teams one at a time: it is useful to have the next question ripped off the pile and ready to be given
- Teams may have 2 chances with each question and the answers are to be written on each question sheet
- If the first answer is correct, the next question is given
- If the first answer is incorrect, the team may EITHER have a second attempt or chose to pass and be given the next question
- Have the team write their names on this sheet after the end of this round
